

MISSION STATEMENT

Ranch Creek Recovery was established to provide quality recovery treatment services to individuals who are seeking to overcome alcoholism, substance abuse, and other addictions and move forward in their lives in a positive and creative direction.

Our goal is to provide an intimate, serene, and natural setting where our clients can find the security to explore the personal issues that have led to the addiction and the strength to discover the greater destiny that lies beyond their addiction.

Our programs include therapeutic and holistic methods to help our clients regain self-empowerment, improve their physical and emotional health, implement positive changes in their lives, maintain their sobriety, and return to society as productive members.
